

Special coating is made of foarm.

Re • Born®

🌍 E C O process 🍃

The new coating material 《Re•Born》 does not produce any waste, because it does not use waters at processing.

We developed a new coating machine that be able to cover the chemical that is state of the bubble on the clothes, for the first time in the cloth industry .

Most of the property is processed only one side. So, the cloth is made different faces in the front and back.

《Re•Born》, which was named after being processed, is a rare and novel art that was achieved by a japanese skilled craftsmen. His work was made at our trditional factory in Bisyu japan.

Four Features of Re•Born

like leather resin finish Re • Born® 弾 Dan

single-side water repellent finish Re • Born® 蓮 Ren

give tension and elasticity Re • Born® 張 Hari

like paper resin finish Re • Born® 紙 Kami
